What we offer

Our tailored programmes match the age and requirements of your students to your goals for the week. We design an itinerary with a mixture of adventure activities and team-building challenges. Combining both helps build self-confidence and encourages the development of relationships within the group. These challenges can also offer insight for teachers into the pupils' strengths and characteristics that can remain hidden within the school environment.

It isn't only the activities which will challenge young people and provide memorable experiences. Staying away from home for two or three nights is a real adventure for many. Learning to live alongside others, eat food not cooked by their parents, and sleep in a new bed can all enhance the adventure.

The key to our residentials is the relationships our instructors build with your young people. Schools return to A+ year after year because they see children genuinely encouraged by our friendly instructor team. Our team to get to know the young people and make every effort to ensure they have the time of their lives.
